EXPERIENCE

ACA NorthPoint - Jr. Application Support Engineer (July 2015 - November 2015)
• Provide application support, clarify clients' issue and ticket the cause and solution.
• Debug C# application and MSSQL database to be less error-prone. This also requires creating and modifying stored procedures, user defined functions, triggers, and views.

Professional Sports Publishing - Data Analyst (February 2013 - July 2015)
• Write Queries and provide application support to salesmen.
• Debug inhouse VB application and MSSQL database. Find ways to lessen errors, speed up queries/application processes.

ZIGIny - Intern (July 2012 - December 2012)
• Debug inhouse customer/inventory app, going through HTML, CSS, JavaScript, ASP, MySQL.

....
...

SKILLS

Ruby, Rails, JavaScript, jQuery, React, Flux, HTML, CSS, SQL, Git, Java

....
...

PROJECTS

Oddjob: A job posting app clone of Indeed (JS, Rails, SQL, React.js)
• A single-page app that uses RESTful JSON API and a Flux architecture on the client side.
• Secure authentication using Facebook Omniauth for smoother UX.

Bric-a-break: Browser game based on Breakout (JavaScript)
• Uses collision detection between objects allowing responsive object interaction.
• Smooth keyboard and mouse control.

Deep-Red: Implementation of chess (Ruby)
• Adheres to Object-Oriented design principles, utilizing class inheritance for DRY code.

....
...

EDUCATION

App Academy New York, NY (Spring 2016)
• Intensive 3-month full-stack web developer training, focusing on Rails, SQL, JS, React, TDD, algorithms, design patterns, and programming best practices.
Brooklyn College Brooklyn, NY (2009 - 2012)

- BS: Computational Mathematics. GPA: 3.4
