EXPERIENCE

ACA NorthPoint - Jr. Application Support Engineer (July 2015 - November 2015)
• Reduced errors in C# applications and MSSQL databases by creating and modifying stored procedures, user defined functions, triggers, and views.
• Provided application support by clarifying client issues and resolving outstanding tickets.

Professional Sports Publishing - Data Analyst (February 2013 - July 2015)
• Improved efficiency of sales staff by optimizing MSSQL database queries and streamlining application support for inhouse Visual Basic programs.

ZIGIny - Intern (July 2012 - December 2012)
• Debugged customer/inventory app written in HTML, CSS, JavaScript, ASP, and MySQL.

....

SKILLS

Ruby, Rails, JavaScript, jQuery, React, Flux, HTML, CSS, SQL, Git, Java

....

PROJECTS

Oddjob: *A Rails/React single-page app inspired by Indeed* (JS, Rails, SQL, React.js)
• Maintains unidirectional data flow from a RESTful JSON API with the Flux architecture.
• Provides secure authentication using Facebook OmniAuth for smoother UX.
• Incorporates Amazon AWS S3 storage for file attachments, increasing scalability.

Bric-a-break: *Browser game based on Breakout* (JavaScript)
• Incorporates HTML5 Canvas for dynamic and fluid animation.
• Calculates collision detection between objects allowing responsive interaction.

Deep-Red: Implementation of chess (Ruby)
• Adheres to Object-Oriented design principles, utilizing class inheritance for DRY code.

....

EDUCATION

App Academy New York, NY (Spring 2016)
• Intensive 3-month full-stack web developer training, focusing on Rails, SQL, JS, React, TDD, algorithms, design patterns, and programming best practices.
Brooklyn College Brooklyn, NY (2009 - 2012)
• BS: Computational Mathematics. GPA: 3.4
